## QUANTA ANTIVEGETATIVA MI SERVE? HOW MUCH ANTIFOULING NEED?

Prevenire il fouling non è solo una questione di antivegetativa in sé, ma anche di applicazione e spessore di ogni mano. È importante avere abbastanza prodotto per la superficie da trattare, in modo da ottenere la protezione corretta.

*Prevent the fouling is not just a matter of antifouling in itself, but also of application and thickness of each hand. It is important to have enough product for surface to be treated, so as to obtain the correct protection.*
